

**Procedure to connect VTC wireless network for Android**

1. In the Settings, Tap "Wireless and Network".

2. Tap the "Wi-Fi Setting"

3. Tap the "Wi-Fi" to enable the Wi-Fi.

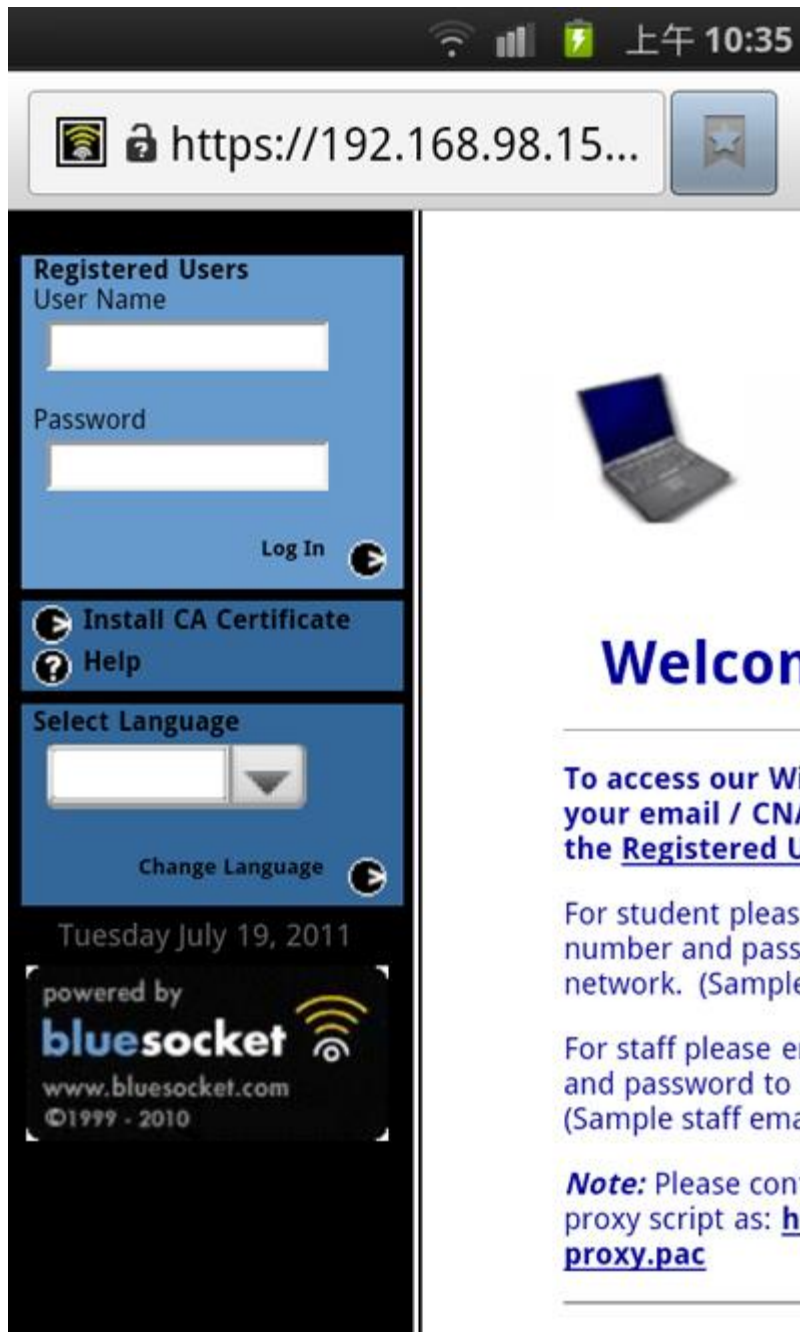

4. Tap the "VTC".

After connecting to VTC WiFi Network, press the "Home button" to exit the "settings".

5. Start a web browser and try to connect to any valid Internet site.  
 If a security warning for the Subscriber Portal page appears, trust the Subscriber Portal site and do all the actions that are required to continue browsing  
 The login page will be displayed, login using your CNA username and password.  
 VTC WiFi wireless LAN service is started after the login was succeeded.

The screenshot shows a mobile browser interface. At the top, the status bar displays signal strength, Wi-Fi, and battery icons, along with the time '上午 10:35'. The address bar shows a URL starting with 'https://192.168.98.15...'. The main content area is a login page with a blue header 'Registered Users'. Below the header are two input fields: 'User Name' and 'Password'. A 'Log In' button with a right-pointing arrow is located below the password field. To the right of the login form is a small image of a laptop. Below the login form are three links: 'Install CA Certificate', 'Help', and 'Select Language'. The 'Select Language' link has a dropdown menu. At the bottom of the page, there is a date 'Tuesday July 19, 2011' and a footer that says 'powered by bluesocket' with the website 'www.bluesocket.com' and copyright '©1999 - 2010'. The footer also includes a Wi-Fi icon.
