

## Wireless Connectivity Guide eduroam (Android)

This document provides the standard operating procedure for establishing a secure connection to the **eduroam** wireless network on Android devices. This allows for seamless connectivity across participating global institutions.

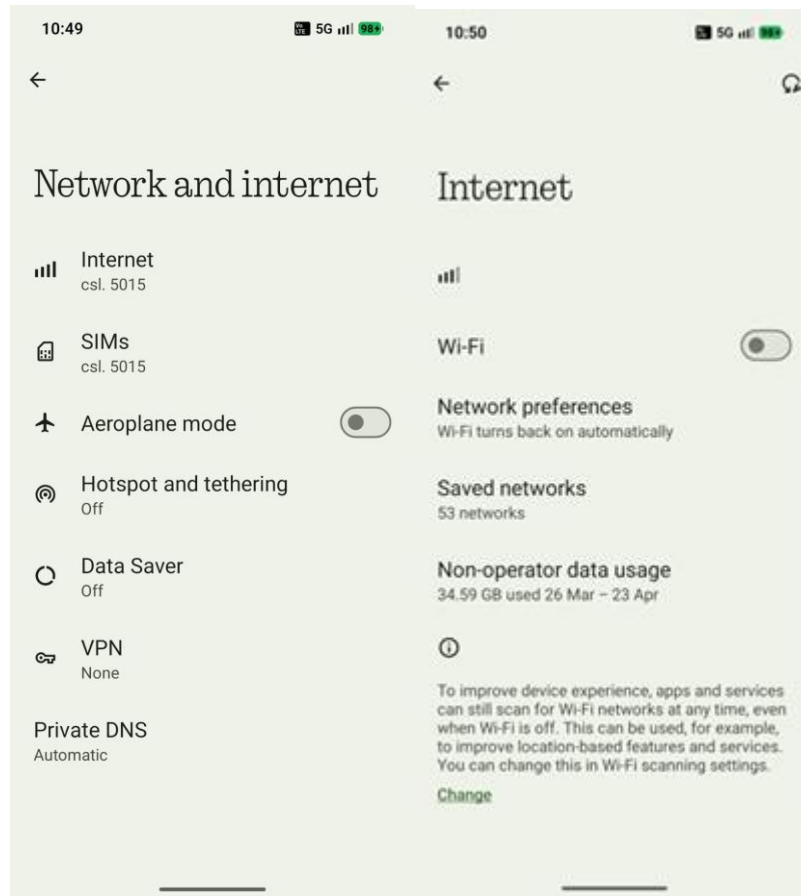

---

### Phase 1: Network Initialization

1. **Access System Settings:** Navigate to the **Settings** menu on your device and select **Network & internet**.

2. **Navigate to Wireless Settings:** Tap on **Internet** to access the Wi-Fi discovery interface.

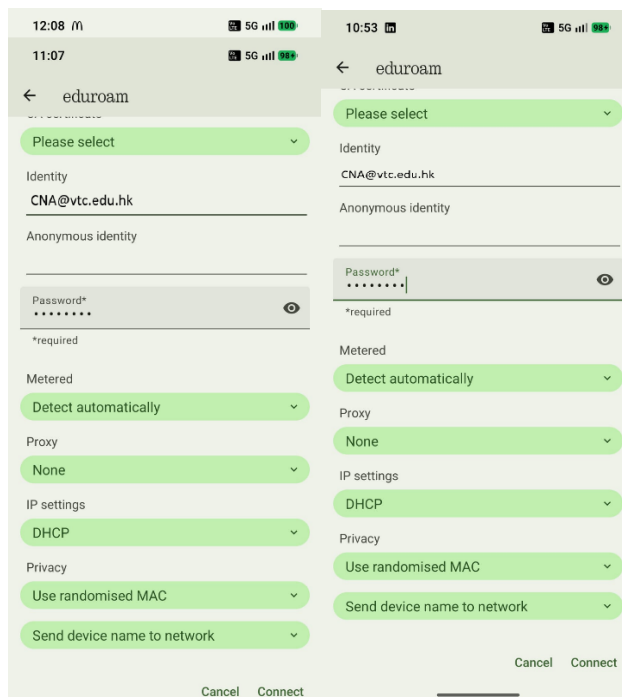

3. **Enable Interface:** Ensure the Wi-Fi toggle is set to **ON**.
4. **SSID Selection:** From the list of available networks, select **eduroam**.

## Phase 2: Technical Configuration & Authentication

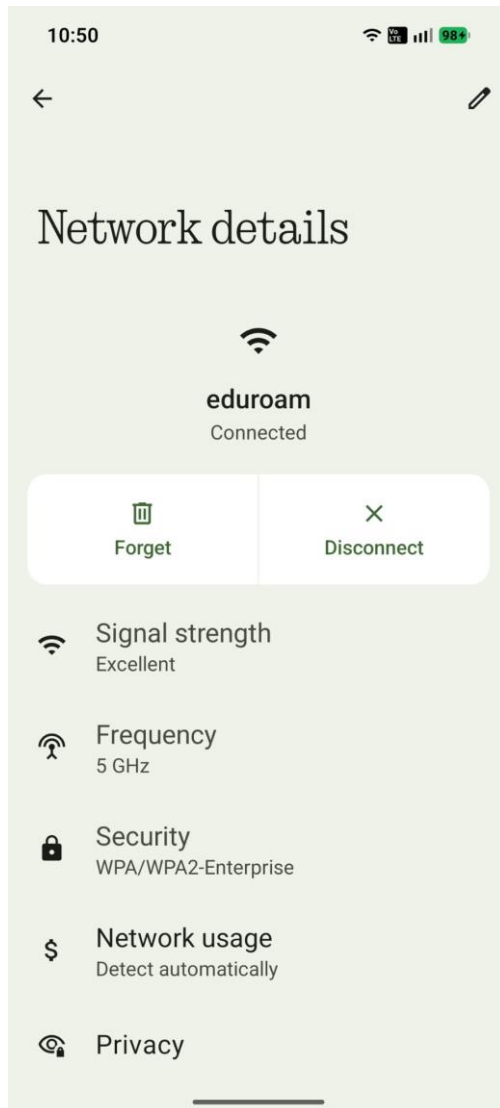

1. **Enter Network Information:** Configure the following security settings exactly as specified:
  - **EAP method:** Select **PEAP**.
  - **Phase 2 authentication:** Select **MSCHAPV2**.
  - **CA certificate:** Select **Use system certificates**.
  - **Online Certificate Status:** Select **Do not verify**.
  - **Domain:** Input **vtc.edu.hk**.
  - **Identity:** Input your institutional **CNA Account** identity (e.g., CNA@vtc.edu.hk).
  - **Anonymous identity:** This field must be left **blank**. If "Anonymous" is pre-filled, please remove the text.
  - **Password:** Input your registered **CNA password**.

2. **Establish Connection:** Tap the **Connect** button at the bottom of the configuration screen.

### Phase 3: Verification & Troubleshooting

1. **Connection Confirmation:** Upon successful authentication, the status of **eduroam** will change to **Connected**.

### 2. Connection Failure Protocol:

- In the event of a connection failure, please attempt to **"Forget"** the network profile within the Wi-Fi settings to clear existing configuration data, then retry Phase 1.
- If connectivity issues persist, please contact the **ITO Helpdesk** or your **Local Campus IT Support Team** for technical assistance.
